RE: Letter of Recommendation

I am pleased to provide a reference letter based on the work The Medicus Firm has done and is still doing for St. Joseph. We could not be happier with the excellent level of service and results they have provided, and we look forward to a long standing partnership.

We engaged The Medicus Firm in August of 2013. As a large medical center serving 10 counties across the Brazos Valley, we had a variety of needs so their contract made perfect sense to us since it is economical and efficient. We also wanted to make sure we contracted with a firm that has a great reputation nationwide, a firm who had the resources and expertise to provide high quality candidates in a timely manner.

The results have been outstanding. We have had 15 candidate interviews in primary care including family practice, urgent care, and occupational medicine. We have already placed 4 of those physicians with others pending signatures on final contracts. We had The Medicus Firm team recently begin working on the following additional searches: trauma surgery medical director, interventional cardiology, pediatrics and neurology. In just two months we have interviews set in all specialties with others being scheduled. I am very pleased with the quality of candidates that are being presented, and I am so happy to work with a recruiter who does an excellent job screening based upon what we really need.

I would strongly recommend The Medicus Firm to anyone looking for a high quality company who provides excellent service and results. They have been a fantastic solution for our hospital, and they work very well with our in-house team here at St. Joseph Health System. Feel free to reach out to me directly if you wish. I would be happy to discuss with you if additional details are needed regarding our experience.

Sincerely,

  
Mrs. Gail Lazarine
